DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims s 1 - 13, drawn to a method for classifying plant embryo quality.

Group II, claims 14 - 26, 28 - 40, drawn to a method for classifying plant embryo quality.

Group III, claim 27, drawn to a method for classifying plant embryo quality.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Under Unity of Invention, Part 1 (Annex B, MPEP), the method for determining unity of invention under Rule 13 permits the inclusion of any one of the following combinations of claims of different categories in the same international application: (i) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product, or (ii) in addition to an independent claims for a given process, an independent claim for an apparatus of means specifically designed for carrying out the said process, or (iii) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product and an independent claim for an apparatus or means specifically designed for carrying out the said process.

The above inventions do not share a special technical feature as indicated by the paragraph above. Specifically, the invention of group I requires algorithms based on

more than one embryo perimeter, the invention of group II requires a metric based classification and group III requires absorption and/or reflectance data.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
